

The Power of Enagic (E.O.W) Strong Acidic Water Hypochlorous Acid Water

What Are You Disinfecting With?

Electrolyzed Oxidizing Water is electrolytically generated **Hypochlorous Acid (HOCl)**, a neutral-to-acidic electrolyzed water. HOCl has been studied for over 100 years and it is an undeniable fact that it is a more powerful oxidant than chlorine bleach. Only within the last 30 years have we been able to generate solutions of near 100% HOCl in such a stable form. HOCl kills bacteria, bacterial spores, and viruses 100 times more effectively than chlorine bleach.

It is a proven anti-bacterial, anti-microbial, and anti fungal for use on skin, foods, plants, counter tops, etc. Electrolyzed Oxidizing Water is safe, non-toxic, and non-irritant. EOW can be used to sanitize all contact surfaces in the hospital including patient rooms, hospital beds, chairs, medical equipment and instruments, nursing stations, surgery rooms, floors, and bathrooms.

~ No matter what they claim, no other ionizer produces the 11.5 and 2.5pH waters that Enagic's medical devices produce ~

Unparalleled for cleaning open wounds and killing infection, Enagic's strong acidic 2.5pH water is indispensable in the home and commercial operations, keeping areas not only safe and sanitized, but providing a powerful cleaning alternative to harsh and expensive chemicals. Electrolyzed Oxidizing Water is natural and eco-friendly. It is generated from table salt, water, and electricity.

This water has been tested at universities in the United States and Japan and has been noted to kill, among other things, E-coli; Salmonella; Tuberculosis; Staph; MRSA (antibiotic resistant staph); microbial bacteria on produce and meats, disinfect surgical equipment and surfaces etc. Yet be safe enough to use as a mouthwash, eye drops, or hand wash.

Commercial operations ranging from daycare centers to medical clinics, restaurants, hair salons, fitness facilities, beauty salons, nursing homes, horse ranches, veterinary hospitals, athletic clubs, dental offices and virtually any public facility all benefit from strong acidic water.

Here are some reasons why we are the leaders in this field:

A water device from Enagic can save you money.

Not only is the initial cost very reasonable but the hypochlorous acid water is only pennies a gallon. It is reported that, prepackaged hypochlorous acid water cost from \$250 to \$865 PER GALLON. For the cost of a few gallons of packaged Hypochlorous Acid Water, you can purchase a device from Enagic that has been tested to last over 20 years and produce fresh Hypochlorous Acid Water as needed. Enagic Kangen Machines range in price from \$3,980 to \$5,980.

The water devices from Enagic carry 3 certifications from Det Norske Veritas:

ISO 14001 – International Standard for Environmental Management Systems, ISO 9001 – International Standard for Quality Management & Customer Satisfaction, ISO 13485 – Specific Quality standard for the manufacturer of Medical Devices

Det Norske Veritas is an agent of the US Department of Health & Health and Human Services. DNV has been given the responsibility of certifying UK and US healthcare facilities. In the US, DNV determines if a healthcare facility qualifies to be or remain a participating provider for Medicare and Medicaid patients.

Hypochlorous acid water is recommended by the US Center for Disease Control.

Enagic's devices are the ONLY ones licensed as medical devices.

These devices from Enagic are the only ones in the world to receive WQA (Water Quality Assoc.) Gold Seal Certificate of Compliance on the machines themselves as well as the filters.

By purchasing a water ionizing processor from Enagic, you have a DNV certified water ionizing device that can generate virtually unlimited quantities of fresh hypochlorous acid water. It would be a major asset for any healthcare or wellness facility.

Unlike other Hypochlorous Acid Generators, Enagic devices can generate 5 different types of water.

ONE MACHINE, 5 TYPES OF WATER

STRONG KANGEN WATER 11.5pH

- Emulsifies Oil - Clean Food & More

Kangen Water 8.5 - 9.5pH

- Healthy Drinking and Cooking

Clean Water 7.0 pH

- Neutral; baby or medication

Beauty Water 5.5 pH

- Skin, Hair, Plants, Cleaning

Strong Acid Water 2.5 pH

- Disinfects, Kills Virus & Bacteria

Strong
Kangen Water
pH 11.0

Kangen
Water
pH 8.5-9.5

NEUTRAL
WATER
pH 7.0

ACID
Water
pH 4.0-6.0

Strong
Acid Water
pH 2.7

There is an entire additional aspect of health benefits from the alkaline, antioxidant water produced from these processors for drinking purposes.
